For the company ACCOLADE, the developer of industrial parks, we realized the replacement of the obsolete discharge outdoor lighting with new modern LED luminaires. The installation was carried out in two phases, in the first phase: the replacement of the luminaires on the existing columns, in the second phase: the replacement of the luminaires on the facades and loading ramps. Part of the delivery was also special lighting for pedestrian crossing.

All luminaires are controlled by twilight sensor. Everything was delivered on time, in perfect quality and fully in accordance with the customer's specifications. The customer's total operating costs were reduced by 53% while meeting all standard requirements.

	Original installation	ARGIA lighting solution
Type of luminary	Fluorescent luminaires T8	THORN CIVITEQ
Number of luminaires	102 units	104 units
Total Input	13,41 kW	39.40 kW
Consumption kWh/year	56 293 kWh	26 704 kWh

The customer's total operating costs were reduced by 53% while meeting all standard requirements.
