

56%

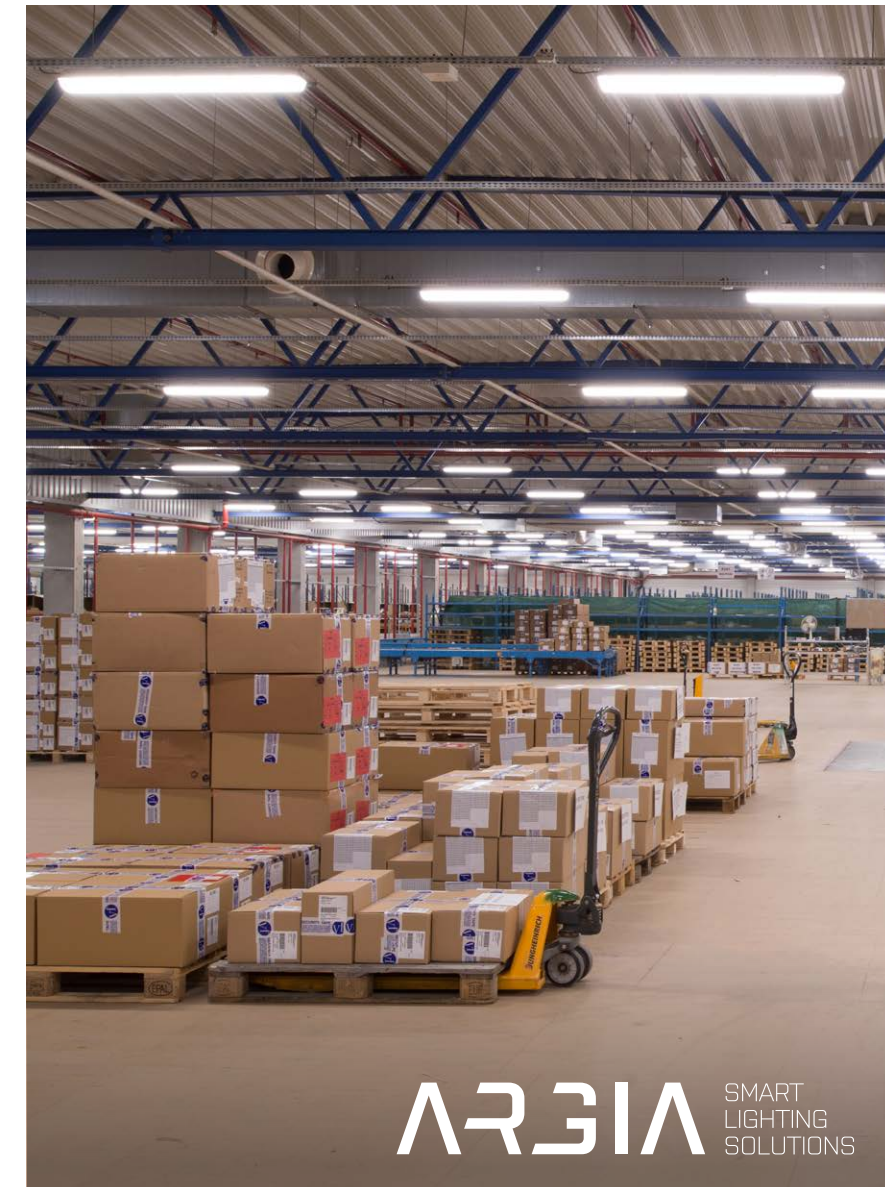

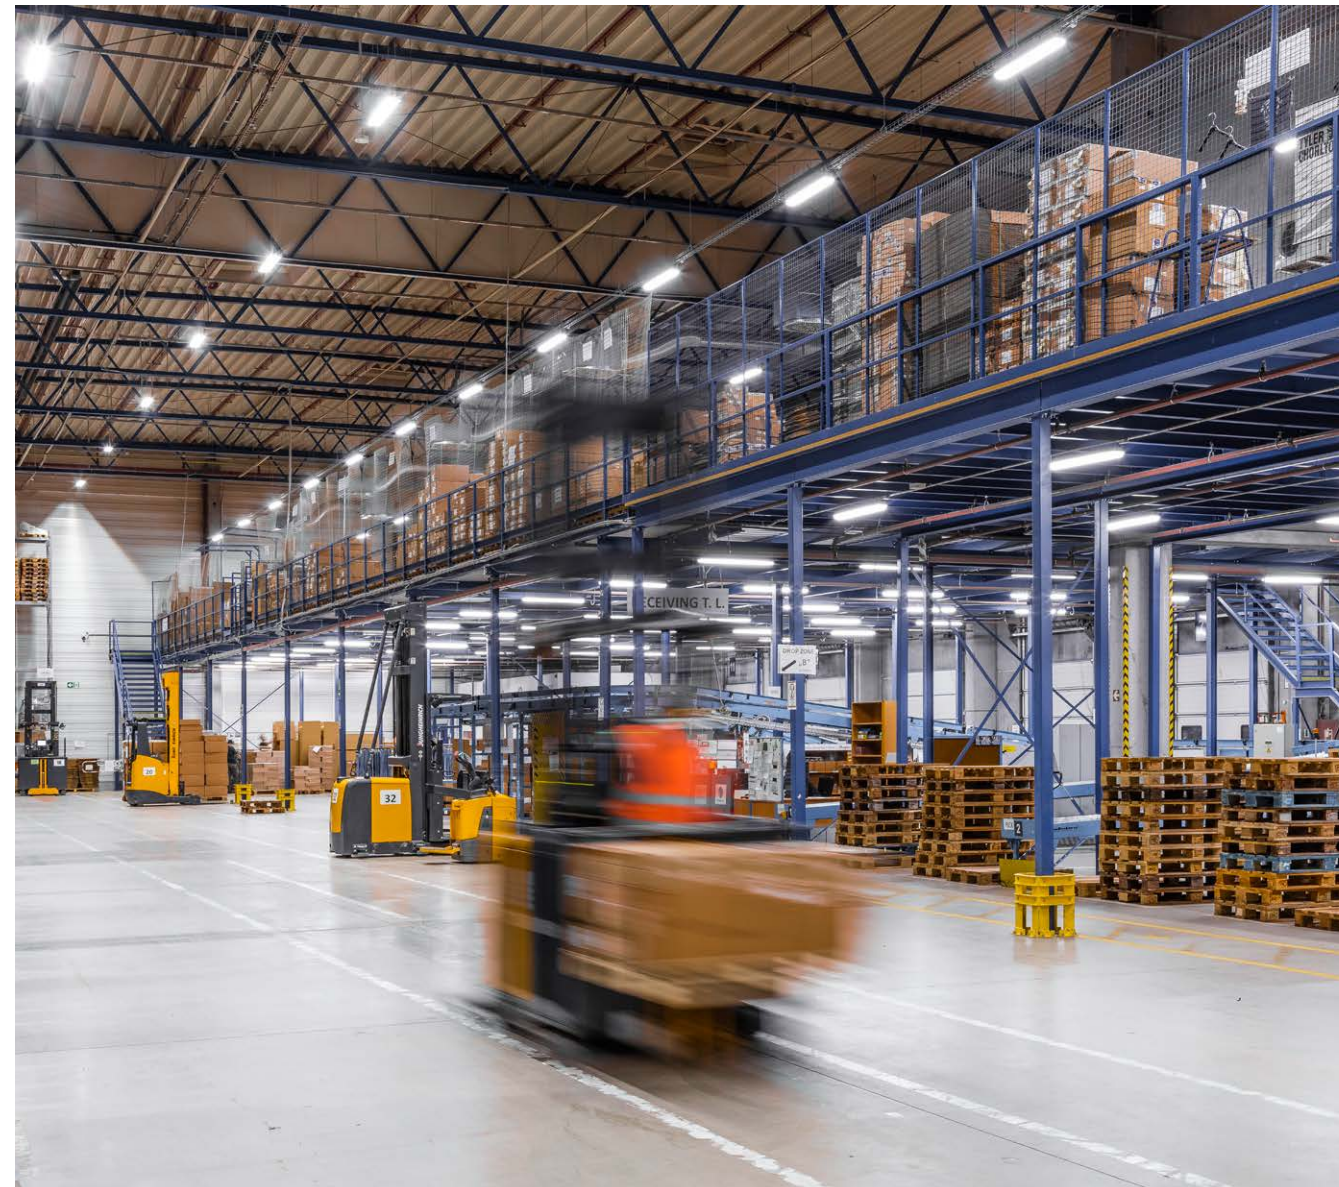

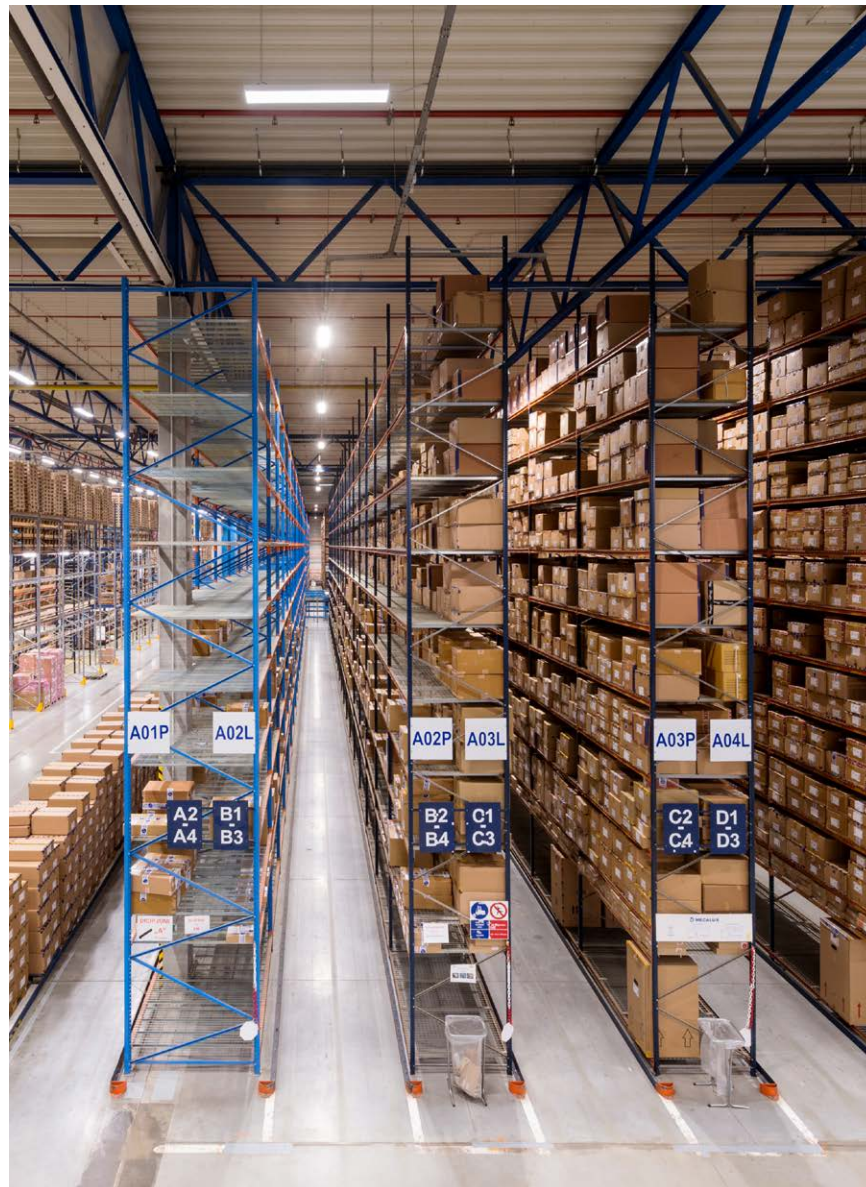

## VF CZECH SERVICES, ZDIBY, CZE

For company VF Czech Services, s.r.o. we have replaced the already inadequate lighting in the logistics and warehouse hall in Zdiby with a total storage and shipping area of 48,000 m2. Inconvenient fluorescent luminaires have been replaced by modern industrial LED luminaires with high protection IP66. Luminaires are switched by motion and luminance sensors. With this renovation, the customer has increased the level of

illumination by up to 50%, and in addition, the premises have been illuminated before completely without lighting. In addition, emergency lighting was newly installed in a total amount of 1,080 units.

	Original installation	ARGIA lighting solution
Type of luminary	Linear fluorescent lamps T8	<b>INDUSTRY LINE AL</b>
Number of luminaires	3,569 units	<b>4,075 units</b>
Total Input	246.41 kW	<b>153.95 kW</b>
Consumption kWh/year	1,537,616 kWh	<b>680,459 kWh</b>

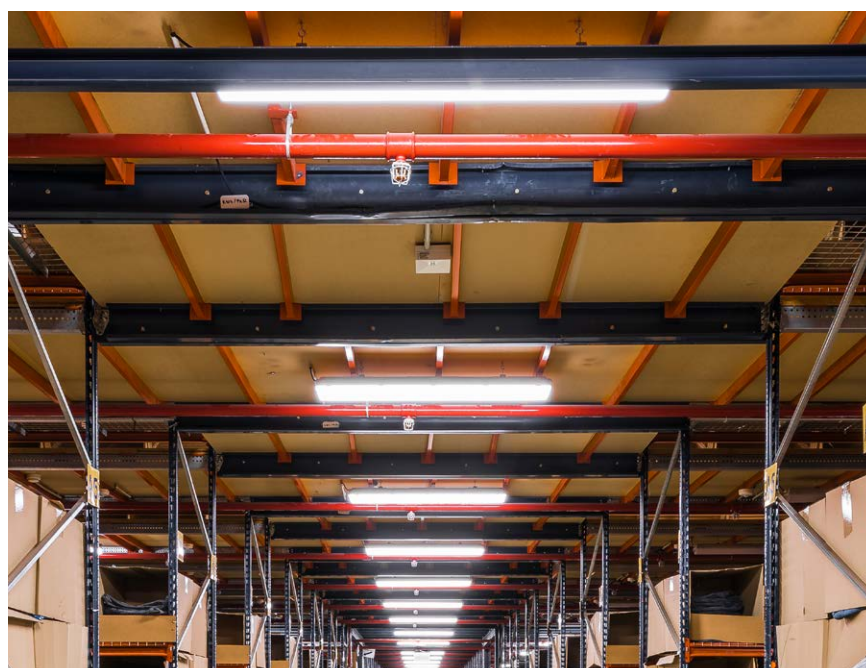

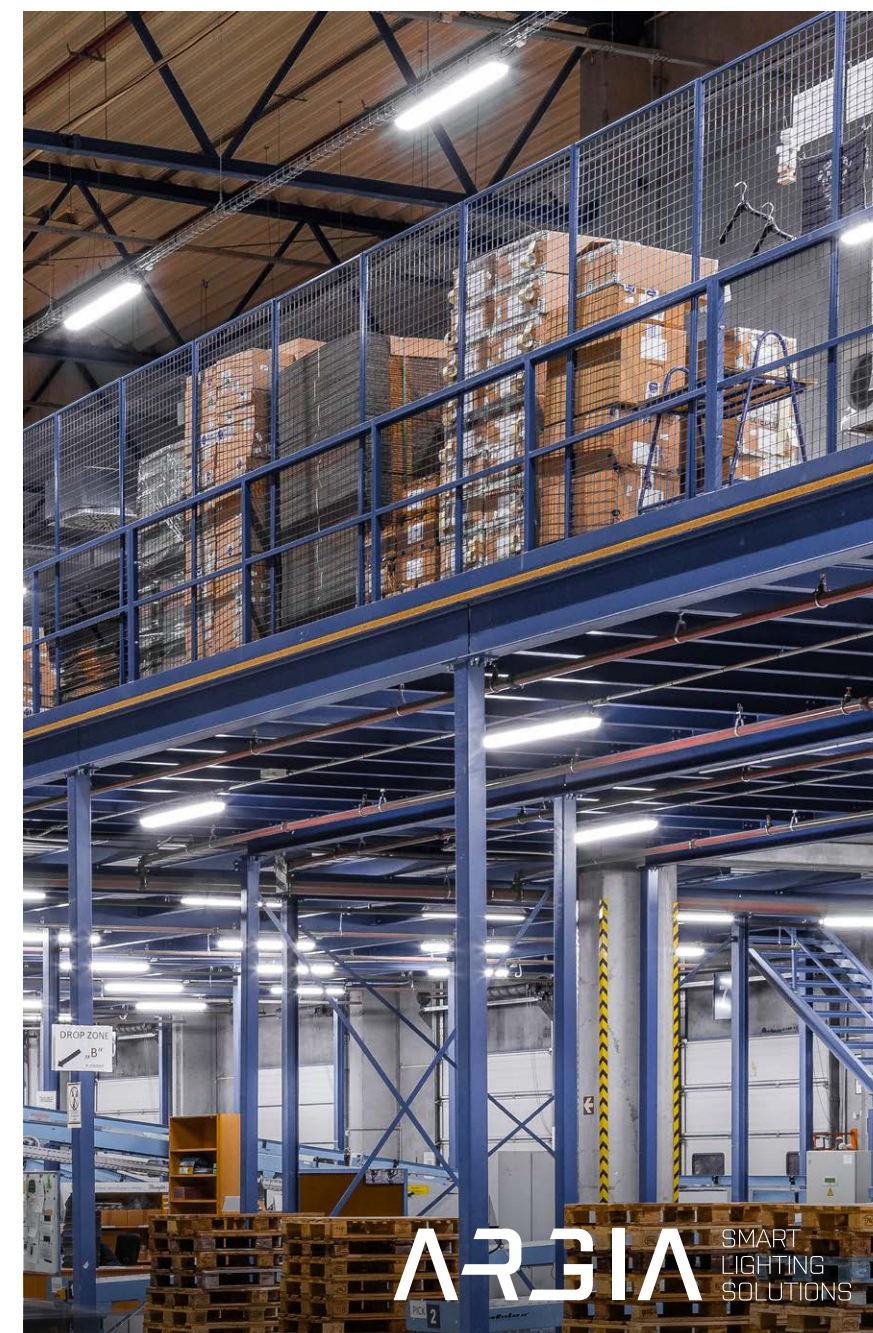

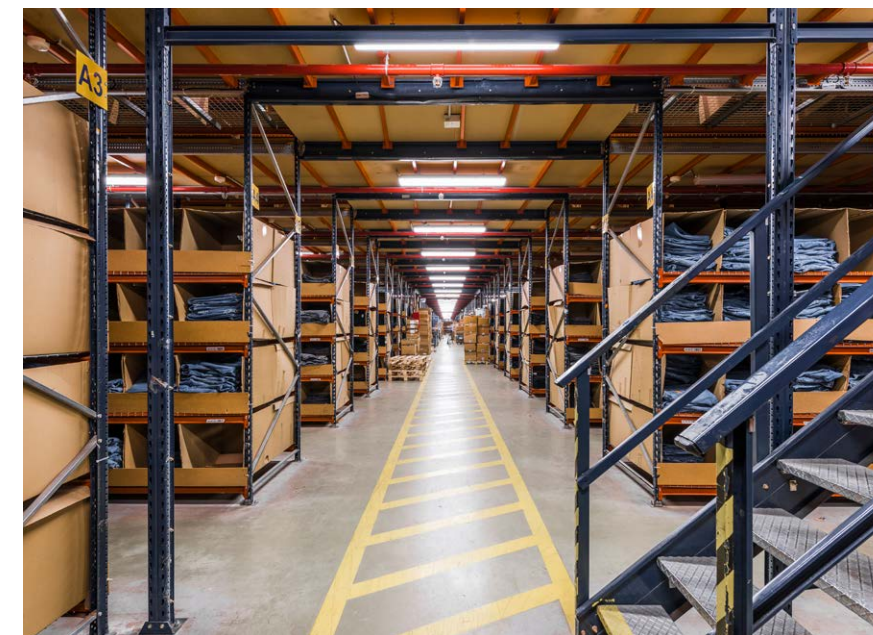

Customer's total operating costs reduced by 56% while significant increase of the illumination levels of all surfaces and the illumination of other surfaces.
