

PROLOGIS MEXICO

178 PROJECTS
1,400,000 m²
43,000 luminaries

AVERAGE ESTIMATED SAVINGS:

63%

THIS IS EQUIVALENT TO:

 **1,792,468**
Gallons of gasoline consumed

 **3,435**
Passenger vehicles driven for one year

 **354,556**
Tree seedlings grown for 10 years

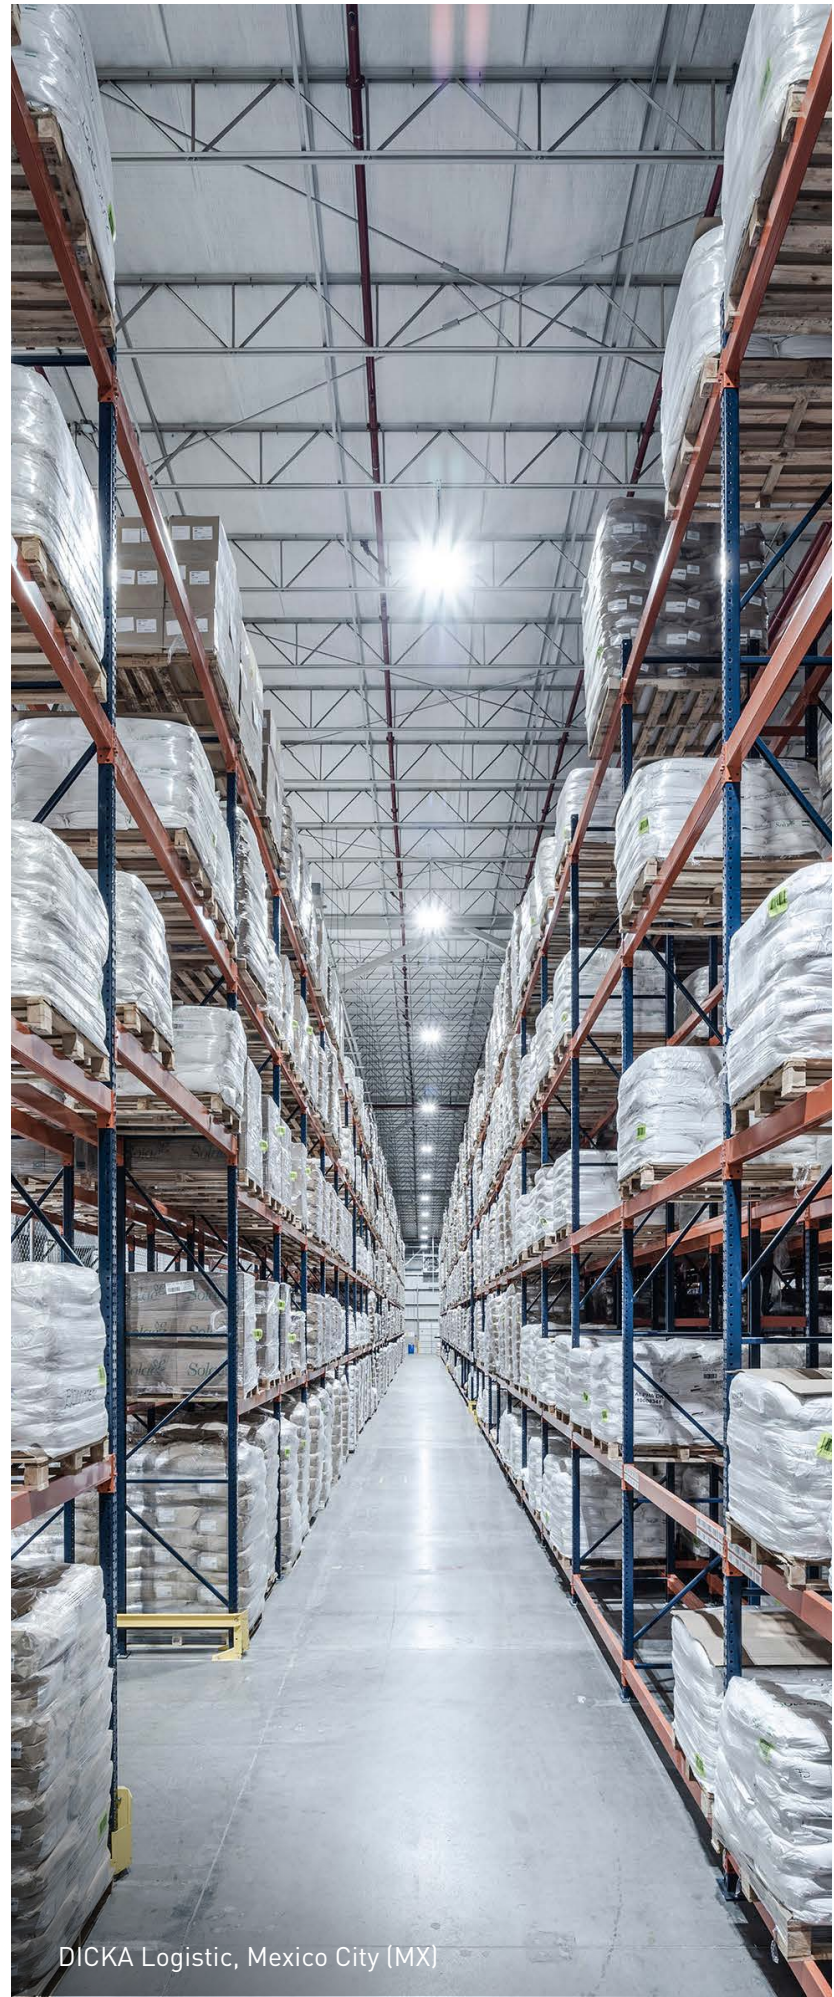

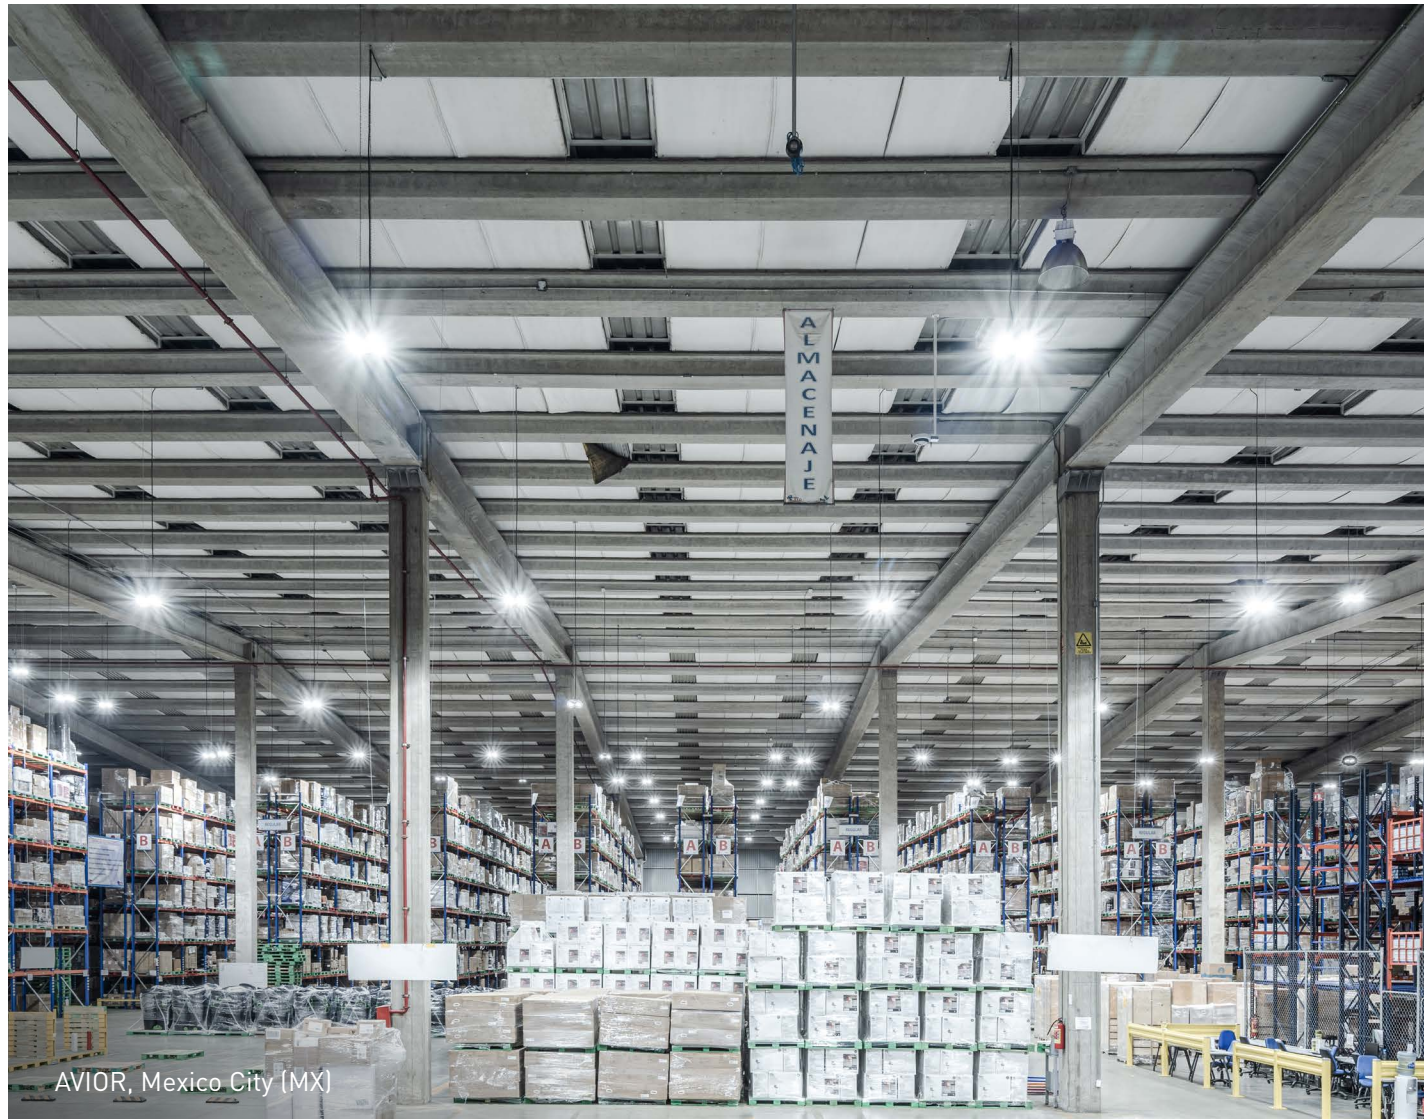

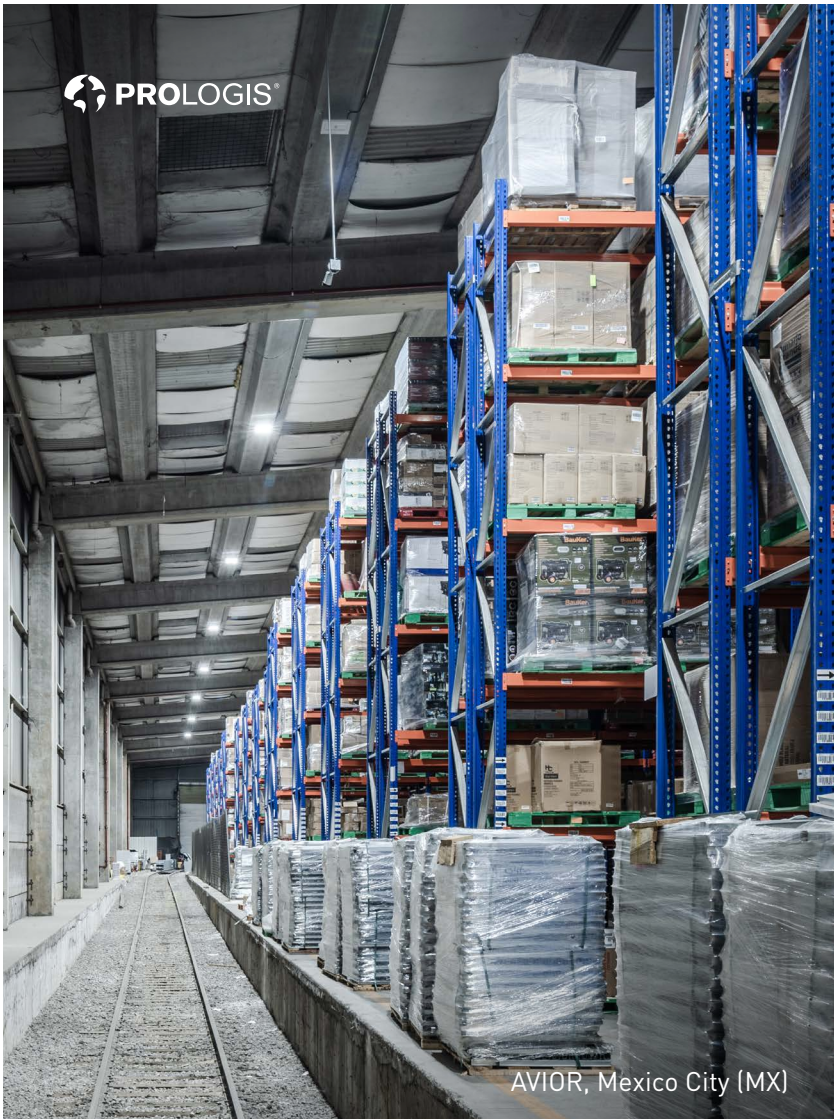

ANNUAL FIGURES

Energy Saved	32,024,025 kWh
CO ₂ Saved	15,371,532 kg

INSTALLATIONS

Area delivered	1,400,000 m²
Average Lead Time in days	34
Number of installed fixtures	43,000
Accidents during installation	None

For the leading global developer PROLOGIS MEXICO, from 2019 to 2023, we realized the replacement of obsolete industrial and off ice lighting in industrial and logistic centers in Guadalajara, Monterrey and Mexico City. There were 178 halls with a total area of over 1,400,000 m², for example for DHL, KUEHNE NAGEL, AVIOR and DICKA. The new modern LED luminaires are equipped with combined motion and luminance sensors that control each luminaire separately. By installing new modern LED luminaires with combined motion and brightness sensors, the customer saves more than 63% of electricity.
